

AN INSTITUTIONAL APPROACH TO ADVANCED GOLD EXPLORATION

INVESTMENT HIGHLIGHTS

- Ashanti's flagship project, Kossanto East, is located in the prolific Kenieba Inlier shear zone with potential to be similar to other major gold deposits in the region owned by Randgold, IAMGold, AngloGold Ashanti and Teranga
- Significant land package in Ghana adjacent to Newmont's Akyem Mine, one of the Africa's largest gold mines
- Quick asset advancement due to historical work, extensive local mining services availability and earn in agreements
- Drilling set to commence in Q2 2018 with an anticipated maiden NI 43-101 report in Q3 2018 at Kossanto East

ASHANTI BELT PROJECT, GHANA

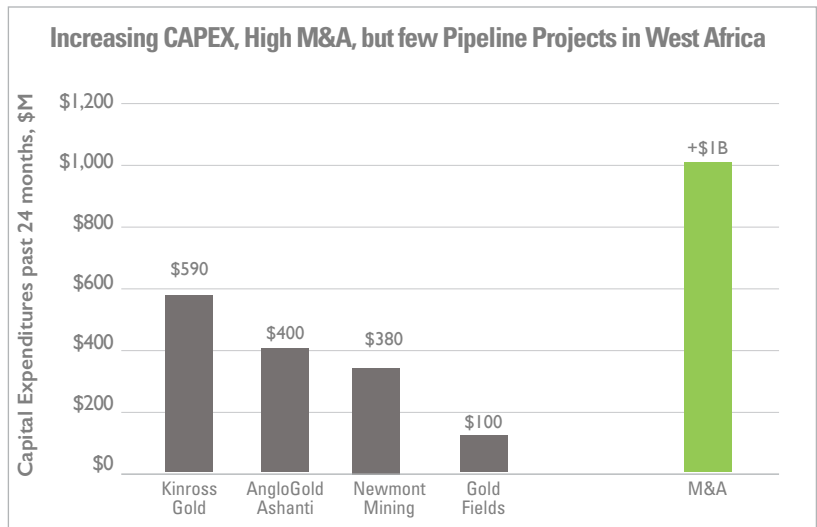

- Adjacent Newmont Akyem mine has potential operation synergies due to geology and infrastructure
- Very attractive earn-in terms from Kinross Gold. AGZ can earn 100% interest by expending US\$1.0M on exploration over two years
- Geophysical results coincident with gold mineralization on Akyem appear to extend onto the Project

KOSSANTO EAST PROJECT, MALI

- Positioned within the highly gold-endowed West Mali Gold Belt
- Located near the intersection of two major shear zones associated with numerous multi-million ounce gold deposits
- Area has yielded 40M oz of gold and 8 mines in the past 20 years
- Two zones of gold mineralization with combined strike length of 2.3km, 50m to 100m wide, mineralization intercepted down to 125m beneath the ground surface – best drill results include: 47m @ 3.29 g/t, 41m @ 2.22 g/t, 25m @ 1.53 g/t, 13m @ 2.34 g/t
- Near term catalyst - Extending out and adding data points to the existing database, as well as preparing for maiden NI 43-101 report
- 100% ownership of the project

ANUMSO GOLD PROJECT, GHANA

- 10km of conglomerate strike, with 2km having enough data to calculate historic resource
- Catalyst is demonstrating material present in the historic resource is present along entire 10km of conglomerate strike; goal is to prepare asset for future NI 43-101 reports
- Located in the Ashanti greenstone belt, home to multiple large gold deposits – Akyem (Newmont), Obuasi and Iduapriem (AngloGold Ashanti), Tarkwa and Damang (Gold Fields)
- 75% earn-in option with Goldplat PLC
