

AN INSTITUTIONAL APPROACH TO ADVANCED GOLD EXPLORATION

INVESTMENT HIGHLIGHTS

- Ashanti's flagship project, Kossanto East, is located in the prolific Kenieba Inlier shear zone with potential to be similar to other major gold deposits in the region owned by Randgold, IAMGold, AngloGold Ashanti and Teranga
- Significant land package in Ghana adjacent to Newmont's Akyem Mine, one of the Africa's largest gold mines
- Quick asset advancement due to historical work, extensive local mining services availability and earn in agreements
- Drilling now underway at Kossanto East and the **maiden NI 43-101 report is expected in Q4 2018**

KOSSANTO EAST
PROJECT, MALI

ASHANTI BELT
PROJECT, GHANA

ANUMSO GOLD
PROJECT, GHANA

ASHANTI BELT PROJECT, GHANA

- Adjacent Newmont Akyem mine has potential operation synergies due to geology and infrastructure
- Very attractive earn-in terms from Kinross Gold. AGZ can earn 100% interest by expending US\$1.0M on exploration over two years
- Geophysical results coincident with gold mineralization on Akyem appear to extend onto the Project

KOSSANTO EAST PROJECT, MALI

- Positioned within the highly gold-endowed West Mali Gold Belt
- 40M ounces of gold discovered in this area over the past 20 years; 8 new mines have been constructed in the area as a result. Two zones of gold mineralization with combined strike length of 2.3km, 50m to 100m wide, mineralization intercepted down to 125m beneath the ground surface – best drill results include: 47m @ 3.29 g/t, 41m @ 2.22 g/t, 25m @ 1.53 g/t, 13m @ 2.34 g/t
- Near term catalysts – 10,000m drill program underway which could potentially extend out and add data points to the existing database
- Maiden NI 43-101 Resource Calculation to be released imminently
- 100% ownership of the project

ANUMSO GOLD PROJECT, GHANA

- 10km of conglomerate strike, with 2km having enough data to calculate historic resource
- Catalyst is demonstrating material present in the historic resource is present along entire 10km of conglomerate strike; goal is to prepare asset for future NI 43-101 reports
- Located in the Ashanti greenstone belt, home to multiple large gold deposits – Akyem (Newmont), Obuasi and Iduapriem (AngloGold Ashanti), Tarkwa and Damang (Gold Fields)
- 75% earn-in option with Goldplat PLC
